

Activities Report for the Quarter Ended 30 June 2018

Highlights:

- **Customer receipts up 15% on prior quarter to ~\$2.9m with operating cash burn substantially reduced**
- **Largest contract secured since inception - \$1.7m agreement for water treatment facility in South Australia**
- **First commercial orders for proprietary low pressure hollow fibre nanofiltration membrane**
- **Entry into lucrative food & beverage market sector through Aromatec**
- **On track to achieve CY2018 revenue forecast of \$10m-\$12m (previously \$8m-\$10m), an up to 314% year-on-year increase**

25 July 2018: Water and wastewater treatment company De.mem Limited (ASX: DEM) (“De.mem” “the Company”) provides this update on its progress for the quarter ended 30 June 2018.

Financial highlights

Receipts from customers during the quarter to 30 June 2018 increased 15% to \$2.9m (Q1 2018: \$2.6m), driven by new contract wins secured. Total receipts from customers in the first 6 months of CY2018 were \$5.5m. This underpins the upgraded revenue forecast of \$10m-12m for CY2018 and a substantial increase on full year 2017 revenue of \$2.9m.

Operating cash burn has been decreased substantially to -\$230,000 during the quarter, compared to -\$713,000 in the prior quarter (Q1 2018). Net cash used in investing activities was -\$72,000 (Q1 2018: -\$136,000), with \$28,000 earmarked for the Aromatec agreement (see below).

With the uplift in cash receipts and the decrease in cash burn, De.mem’s cash balance was \$2.1m as at 30 June 2018. The Company is well funded to achieve its near term growth prospects.

Please refer to the attached Appendix 4C Filing for further details.

Revenue forecast for CY2018 upgraded to \$10m-\$12m

As advised on 16 May 2018, De.mem increased its CY2018 revenue forecast to \$10m-\$12m (previous: \$8m-\$10m). Compared to CY2017 revenue of \$2.9 million, this is a 314% year-on-year increase.

Revenue growth is underpinned by new project wins, a strong order book and execution of current ‘Build, Own, Operate’ and ‘Operations and Maintenance’ contracts.

\$1.7m contract secured for supply of water treatment solutions in South Australia

During the quarter, De.mem secured its largest ever contract from leading Australian private, integrated property construction group St Hilliers Property Pty Ltd (“St Hilliers”) for delivery of a turn-key water treatment system, including associated equipment and pumping systems, worth \$1.7m.

De.mem will deliver and install the water treatment system, providing clean water to a vehicle wash bay in South Australia. The contract is expected to complete this calendar year.

First commercial orders received for De.mem hollow fibre membranes

De.mem delivered another important milestone with the first commercial orders for its proprietary membrane technology from customers in Singapore and Vietnam. The orders, while not material in value, provide wider validation of the technology ahead of broader commercial deployment.

A purchase order for 20 8-inch wide modules of the low pressure hollow fibre nanofiltration membrane was received from Hung Thanh Environmental JSC in Nghe An province, Vietnam (refer image 1 overleaf). Using the membrane modules, the customer will upgrade an existing membrane-based water treatment plant, which provides potable water to households. As well, the Company was awarded a 'Build, Own, Operate' agreement by Boon's Carwash, Singapore for provision of ultra-clean water.

The low pressure hollow fibre nanofiltration technology is in-licensed from Nanyang Technological University, Singapore ("NTU"), and delivers much lower operating costs, requires reduced investment relative to other conventional water treatment technologies and provides higher quality product water.

Entry into lucrative food & beverage market segment through Aromatec

As announced on 8 May 2018, De.mem made a strategic investment into a partnership with Aromatec Pte Ltd ("Aromatec"), a new Singapore-based company targeting the food & beverage sector.

De.mem invested an amount of SGD\$100,000 in Aromatec. It now holds 32% of Aromatec and will work as a strategic partner, assisting in the manufacturing of systems as it progresses. Further, Aromatec has sublicensed its innovative hollow fibre Forward Osmosis ("FO") technology to De.mem for use in industrial water treatment applications.

The new FO technology will be utilised by Aromatec for the de-watering or cold concentration of products in the food & beverage manufacturing process, such as flavourings, fruit juices, as well as dairy and whey (refer image 2 overleaf). The FO technology has already been deployed to the first commercial projects.

The technology has a strong value proposition for both Aromatec and De.mem. It is seen to be more competitive than current market offerings as it runs without the use of external pressure or high temperatures and therefore helps to conserve key ingredients such as nutrients and aromas.

The partnership facilitates De.mem's expansion into the food & beverage processing sector. The initiative is complementary to De.mem's existing product offering and will deliver an additional revenue stream for the Company in the future.

Management commentary:

Andreas Kroell, CEO of De.mem said: "De.mem continues to execute on its growth strategy, as reflected in the excellent progress we have made during the quarter.

"The substantial increase in customer receipts is underpinned by new contract wins, including the largest received since inception, worth \$1.7m. These contracts, and our strengthening sales pipeline, leave De.mem well placed to achieve its revenue forecast of \$10m-12m for CY2018.

"The increase in revenues comes along with a largely reduced operating cash burn, which decreased to only -\$230,000 during the quarter.

"From a strategic perspective, De.mem also made strong progress with a number of initiatives including receipt of the first commercial orders for its proprietary hollow fibre membranes, and entry into the lucrative food & beverage sector through Aromatec.

"We continue to manage our cost base very tightly without inhibiting growth, as reflected in our rapidly reducing cash burn. With a healthy cash balance of \$2.1m at the end of the period, De.mem is well capitalised and focused on achieving cash flow positivity in the near term."

About De.mem Limited

De.mem Limited (ASX:DEM) is a Singaporean-Australian decentralised water and waste-water treatment business that designs, builds, owns and operates water and waste water treatment systems for its clients. De.mem operates in the industrial segment providing systems and solutions to customers from the mining, electronics, chemicals, oil & gas and the food & beverage industries and in the municipal and residential segments. De.mem has licensed proprietary technologies from its partner in research & development, Singapore's Nanyang Technological University (NTU), including an exclusive worldwide license for a revolutionary low-pressure hollow fibre nanofiltration membrane. Through its wholly owned subsidiary Akwa-Worx Pty Ltd, De.mem has a strong presence in Australia. Akwa-Worx has a market reputation for building high quality Australian designed and manufactured products and has long-term customers in the Australian mining industry. Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
