

De.mem is an upcoming supplier of innovative systems for water treatment and EPC (equipment, procurement, construction) provider for water treatment plants. We are headquartered in Singapore with a wholly owned subsidiary in Vietnam located in Ho Chi Minh City. On the product and development side, we are closely affiliated to Nanyang Technological University (NTU), from which we have in-licensed a number of technologies.

For our operations in Singapore we are seeking a

Technician – Plant Operations and Maintenance (Full Time)

The candidate's profile should ideally be as follows:

- Candidate must hold at least a Higher secondary/Pre-U/A level/College degree, Professional Certificate/NITEC, Diploma, Advanced/Higher/Graduate Diploma in Engineering (Industrial, Mechanical, Metal Fabrication/Tool &Die/Welding, Marine or other field) or equivalent
- Work experience in the above-mentioned areas, ideally in the water industry
- Strong interest in the water industry
- Friendly, able to deal with our customers, with a positive “problem-solver” attitude, motivated, loyal, smart

Roles and responsibilities will include the following:

- Install, commission and operate water treatment facilities on our client's premises in Singapore
- Assist in the fabrication of water treatment systems in Singapore
- Troubleshoot and maintain water treatment systems
- Perform routine maintenance work

We offer a pleasant work environment with international exposure, challenging and broad tasks and the opportunity to grow with the company.

Please submit your complete application – cover letter and CV – to adrian@demem.com.sg . We will reply only to shortlisted candidates.
