

ASX RELEASE | De.mem Limited (ASX:DEM)

De.mem Secures \$500k Contract to Sell Water Treatment Plant

Highlights

- De.mem enters into a contract to sell a water treatment plant in Vietnam
- Contract value is approximately \$500,000
- De.mem designed, built, owned and operated the plant previously under a Build, Own, Operate (BOO) scheme
- The sale represents a significant transaction within the Vietnamese water treatment market, where membrane based water treatment is emerging
- The buyer intends to invest in future upgrades of the water treatment plant with proprietary De.mem membranes

Tuesday, 8 August 2017: Singapore-based water and waste water treatment company De.mem (ASX:DEM) (“De.mem” or “the Company”) is pleased to announce it has successfully completed the sale of a water treatment plant located in Kim Lien Commune, Nam Dan District, Nghe An province, Vietnam, to a local Vietnamese company, Hung Thanh Environment Investment Joint Stock Company. The sale represents a validation of De.mem’s water treatment technology and the Company’s growing exposure in the Asia Pacific region. De.mem designed, built, owned and operated the water treatment plant previously under a so-called Build, Own, Operate (BOO) scheme. The water treatment plant is using modern hollow fibre membranes and generates high quality output water for municipal and industrial use. It has a capacity of up to 4,000 m3 of water per day. The water is used by the nearby municipality and a number of factories. Using De.mem technology, the performance of the water treatment plant can be monitored remotely.

Water treatment plant in Nghe An province, Vietnam, sold by De.mem – hollow fibre membrane water treatment systems and control panel

The sale has a value of approximately A\$500,000, with the purchase price being paid in instalments over the next 30 months. The first instalment which is due immediately is approximately A\$240,000. Hung Thanh Environment Investment Joint Stock Company also intends to adopt De.mem's proprietary membrane technology as part of an upgrade of the facility in the short-term.

Andreas Kroell, CEO of De.mem: "The sale of De.mem's water treatment plant marks a significant transaction within the Vietnamese water treatment market, where membrane based water treatment is emerging. The transaction underlines De.mem's growing brand and market position in Vietnam as a supplier for modern water treatment technology. It also brings along a strong validation of our BOOT/BOO (Build, Own/Operate, Transfer / Build, Own, Operate) product offering."

About De.mem Limited

De.mem Limited (ASX:DEM) is a decentralised waste-water treatment business that designs, builds, owns and operates customised and high-quality industrial waste water treatment systems for its clients. The company presents its product offering in two industry segments (i) the industrial segment where De.mem provides systems and solutions to customers from the electronics, chemicals, oil & gas and the food & beverage industries and (ii) the municipal and residential segment. The company has licensed a number of proprietary technologies from its partner in research & development, Singapore's Nanyang Technological University (NTU). De.mem is headquartered and has a manufacturing site in Singapore. To learn more please visit: www.demembranes.com
